Volume 13-09

Upcoming & Ongoing Events

New Member Orientation 10:00 2nd Sunday of each month

Trap Shooting

Tuesdays: 18:00 - 20:00 (May thru September)
Saturdays: 13:00 - 15:00
Sundays: 09:00 - 12:00

Rifle League

Mondays thru September, 18:00

Trap Doubles Tournament

Wednesdays thru 11 September
17:00 - 20:00

Indoor .22 Rimfire Pin Shoot

Tuesdays, 20 August, 3 & 17 September, 19:00

Indoor Centerfire Pin Shoot

Thursday, 22 August, 19:00

NRA Basic Pistol Shooting Course

Saturday, 24 August, 08:00

Cowboy Action Shooting Match

Sunday, 25 August, High Noon

Board of Directors Meeting

Thursday, 5 September, 19:00
(Email Piney if you'd like to have something placed on the agenda)

Granite State Bowhunters Tournament

Sunday, 8 September

22 Pistol League Organizational Meeting

Wednesday 11 September, 19:00

Indoor Centerfire Pin Shoots

Thursday, 12 & 26 September, 19:00

All Hands Work Party

Saturday, 14 September, 08:00 - 16:00
All Club Ranges Closed

22 Steel Plate Shoot

Sunday, 15 September, 12:00

22 Pistol League

Wednesdays starting 18 September, 17:30 - 20:30

General Club Meeting

Thursday, 19 September, 19:00
Your attendance would be appreciated.

NRA Basic Reloading Course

Saturday, 21 September, 08:00

Outdoor Pin Shoot

Saturday, 21 September, 09:00

CMP SEMI-AUTO SHOOT

Sunday, 22 September, 12:30

The *Trigger Times* is the official newsletter of Country Pond Fish & Game Club, Inc., 82 Pond St, Newton, NH 03858, and is published monthly. Editor: Piney Woods Comments, questions, and suggestions should be submitted to: piney@pineywoodsplace.com

SHOOTING AT CLUB TARGET FRAMES WITH BIRDSHOT OR BUCKSHOT DESTROYS CLUB PROPERTY. VIOLATORS WILL BE FINED \$20 PER TARGET FRAME.

PER ORDER OF THE BOARD OF DIRECTORS
1 AUGUST 2013

RANGE CLOSURES

thru September

(Hours shown are ACTUAL TIMES CLOSED)

CPF&G Club FFL Fees & Rules

THIS SERVICE IS FOR CLUB MEMBERS ONLY

All purchases: Cost + shipping + 3%
All Transfers: \$10

PURCHASES THROUGH THE CLUB FFL ARE LIMITED TO **FIREARMS ONLY**

Club Members may contact Jeff Gersbach at jgersbach@gmail.com to order firearms or to complete firearms transfers by appointment.

Club Members may also order guns themselves, to be delivered to the Club, but must have the sender include a copy of the Club's Firearms Order Form. This form is available on the "Members Only" page of the Club website and at the Club. If this form is not included, the firearm will be returned to the sender, and return shipping plus a \$10.00 service charge will be assessed to the Member.

There will be an additional \$20.00 charge for items shipped to the Club via FEDEX. Choose UPS or the US Postal Service instead.

OUTDOOR RANGE

Every Sunday 10:00 - 12:00
Trap and Membership Tours
Sunday, 25 AUG 09:00 - 17:00
Cowboy Shoot
Saturday, 7 SEP 09:00 - 13:00
GSB Setup
Sunday, 8 SEP 09:00 - 16:30
GSB Tournament
Saturday, 14 SEP 09:00 - 16:00
All Hands Work Party
Tuesday, 17 SEP 09:00 - 13:00
Hampton Falls PD Qualifications
Saturday, 21 SEP 09:00 - 13:00
Outdoor Pin Shoot

TRAP RANGE

Tuesdays 18:00 - 20:00
Saturdays 13:00 - 15:00
Sundays 10:00 - 12:00
Regular Trap (closed to other activities)
Saturday, 7 SEP 09:00 - 13:00
GSB Setup
Sunday, 8 SEP 09:00 - 16:30

RANGE CLOSURES ARE ALSO POSTED NEXT TO THE RANGE SIGN-IN BOOK

LEGAL NOTICE

Proposed Club Bylaw Change

At the next monthly Members meeting, to be held on 19 September, the following change to the Club Bylaws will be voted on.

To add Section 7.1-C:

"Members of the Executive Board and the Board of Directors shall be exempt from Club dues while holding office."

Stay in touch with your Employees

(that's right... they work for YOU.)

<http://www.congress.org/> has links to the White House, the US Senate, the US House of Representatives, and all of your state government representatives.

Let them know how you feel about things.

As an NRA affiliated club, it is important for us to support the National Rifle Association. By joining the NRA through CPF&G Club, \$5 of the annual \$35 fee (\$10 of the \$85 3-yr membership) is paid back to our club. To join, go to <http://membership.nrahq.org/default.asp?campaignid=XC004701> or contact Sharon Theobald at shootinlady655@aol.com or 978-374-8061, or contact any member of the Board of Directors.

Reloading Supplies and Ammo Order

CPF&G Club will be placing an ammo and reloading supplies order in October, for CPF&G Club Members ONLY

Orders will be placed for ammunition in case lots only

Place your order via **email only** to cfgordon@comcast.net and CC: tjmoran12@comcast.net
(You'll need to do your own research for item names, part numbers, etc.)

Be sure to include all pertinent information including exact quantity
(Note that "three boxes", "one case", "two bags", etc. are **not** exact quantities.)

Reloading Supplies examples:

Manufacturer	SKU #	Item	Details	Qty
Cheddite	-	primers	#209	5,000
Nosler	BN 30150	bullets	30 Cal 150gr Spitzer	100
Remington	RXP12	wads		2,000

Ammunition example:

Manufacturer	SKU #	Caliber	Bullet Wt (gr) & Type	Case Size
Magtech	357A	357 Mag	125 gr Jacketed Hollow Point	1,000 rds
Federal	FD4E223G	223 Rem	50gr JHP	500 rds

You may place orders via EMAIL ONLY starting **4 OCT 2013**
All orders must be received no later than **11 OCT 2013**

Cowboy Action Shooting

2013 Matches

- 12 May
- 9 June
- 25 August
- 27 October

THESE MATCHES ARE OPEN TO THE PUBLIC

CPF&G Members \$5.00
Juniors (under 17) shoot FREE
Everyone else \$10.00

A real fun time shooting with great people!

Registration: 10:30 - 11:45
Shooting starts at High Noon

Politics & Legislation

by John Faro, Political Junkie

With our Washington legislators and our state legislators ready to work their legislative magic, beware your life, liberty, and property will be in danger the next few months. Be assured we will keep a wary eye on them once the shenanigans start. While we were trying to enjoy our summer the political class with their committees and information gathering minions were very busy.

One of the issues we in New Hampshire should pay close attention to is the request by the Attorney General of our state to have the legislature review our "Stand Your Ground" law. Because of the outcome of the Zimmerman/Martin trial, which, by the way, had nothing to do with Florida's stand your ground law, there has been a hue and cry raised by the race baiters to eliminate this type of legislation. We had a new ethnic group created by the media during this trial. We now have "White Hispanics" who are roaming our streets shooting "innocent" black youths at will.

I have railed many times in this newsletter about the Obama administration and the corruption, Chicago style politics, anti-American

rhetoric that prevails in the White House. Our task in the coming 2014 elections is to convince the folks who have been living with their heads in the sand that our country is in dire straits. If we don't carry the day in the coming elections we may not have the opportunity in 2016 to put our country back on track to freedom and prosperity. We all have to spend time and effort to get people who believe in the Constitution of the United States and want to see our country return to the rule of law elected to our state and federal legislative bodies. We must continue to fight for our rights or we will see our country fall to the level of a third world dictatorship within our life time.

We have all heard the "Dear Leader" state that we are being pummeled with "phony" scandals. Does anyone believe the IRS scandal is not true? Time for a little history:

"He has, acting personally and through his subordinates and agents, endeavored to cause, in violation of the constitutional rights of citizens, income tax audits or other income investigations to be initiated or conducted in a discriminatory matter".

Any guesses?

Answer: Article 2, Section 1, Articles of Impeachment against President Richard M Nixon adopted by the US House of Representatives Judiciary Committee, July 29, 1974.

So where is the outcry by our Progressive/Democrats? They initiated the Articles of Impeachment in 1974. Our "Dear Leader" makes Mr. Nixon look like a choir boy but it cost Nixon the Presidency. Are we living with a double standard because the president identifies himself as a black man?

If we are going to begin the process of healing our country and return to the Constitution and the rule of law we have to be successful during the 2014 midterm elections. We have many things to worry about in our daily lives. Mortgage payments, education for our children, food on the table, employment, etc. If we do not pay attention to these folks who we sent to Washington, DC, to represent us they will be glad to do what is best for them, in their opinion, instead of doing what is best for us and the United States of America.

Eternal vigilance is not a joke; they are words to live by.

CMP MATCHES (CIVILIAN MARKSMANSHIP PROGRAM)

Saturday Matches start at 09:30
Sunday Matches start at 12:30
Setup starts 1/2 hour earlier

\$10.00 Entry Fee
Ammo Required: 50-60 Rounds
Open Sights Only

THESE MATCHES ARE OPEN TO THE PUBLIC

For more information, contact Steve Sousa at 603-772-5422 or shooter1911@hotmail.com or go to <http://www.countrypondfishandgameclub.com/cmp.html>

Mikhail Timofeyevich Kalashnikov, The Man

from "The AK47 Story" by Edward Clinton

There are a handful of engineers and designers whose influence in firearms design was seminal and is still keenly felt in the firearms community today. Indeed, it is not inaccurate to say that the design of every successful firearm is nothing more than an adaptation of principles developed by these men. Tremendous debts are owed to men with names like Browning, Nickl, Mauser, Walther, Wesson, Mannlicher, Kalashnikov, and Lee. This article is a look at Mikhail Timofeyevich Kalashnikov's contribution to firearms design.

Mikhail Timofeyevich Kalashnikov was born on November 10, 1919 to a modest peasant family in Alma-Ata, Kazakhstan. At the age of seven, he entered the Ten Year School (the Soviet equivalent to American primary and secondary education). Upon graduation, Kalashnikov went to work for the Turkestan- Siberian Railroad system, and within two years had risen to the position of Technical Secretary. Working for the railroad was an important step for Kalashnikov. In the Soviet Union, as in other nations that underwent rapid industrialization, the railroad was a repository of technical knowledge and a hotbed for innovation. As such, it formed a fertile ground for many aspiring engineers like Kalashnikov.

In 1938, Kalashnikov was conscripted for his mandatory service in the Red Army. During his early months in the army, he became more and more interested in small arms. Indeed, Kalashnikov managed to earn the ire of his company commander because of the steady barrage of questions concerning the operating mechanisms of various small arms and other pieces of equipment. The commander, however made a fateful decision that has affected the world to this day. Instead of discouraging Kalashnikov's inquiries, as so many others in the Soviet military might have done, he discerned that real mechanical talent was afoot, and recommended Kalashnikov for a technical course that

would qualify him as an Armorer once he had completed his basic training. As a result, Kalashnikov attended the training school for tank drivers. While he was there, he designed and built his first piece of new equipment, a mechanism with which to measure the tank's fuel consumption. Later he designed an improved track assembly for tanks.

As a result of these accomplishments, Kalashnikov was promoted to Sergeant, and in 1939, was sent to Leningrad to serve as technical advisor for the factory producing his fuel gauge and track assemblies. This posting ended when Nazi forces invaded the Soviet Union on June 22, 1941. Rejoining the active army as a Senior Sergeant, Kalashnikov was posted to a front line armor unit. There he served as a tank commander in Marshal Katukov's First Tank Army. In September 1941, Kalashnikov's unit saw fierce combat during the battle for Bryansk, and his tank was struck by a German shell. Kalashnikov was badly wounded by a shell splinter which ripped open his shoulder. Shuttled from battlefield aid station to a field hospital, he was eventually transferred to a hospital far to the rear.

Lying in the hospital and exchanging war stories with other wounded Soviet soldiers, Kalashnikov heard one refrain repeated over and over again: German superiority in automatic weapons, notably submachineguns, had turned the tactical tide again and again against the Soviet forces. From these conversations, the germ of an idea was planted. Kalashnikov began to think he could contribute more to the war effort as a designer of automatic weapons than as a tanker. He asked the hospital librarian to bring him all the books on small arms available so that he could begin to study existing designs. One of the books was V.G. Fedorov's basic weapons textbook, *Evolution of Small Arms*, which was published in 1939. As Kalashnikov himself recalls: "That was my lucky day. The book by Vladimir Federov proved to be invaluable. It gave

me my first insight into the principles of developing automatic firearms, and put me straight on the positive and negative aspects of each class of firearms."

Senior Sergeant
Mikhail Timofeyevich Kalashnikov
*Image Credit: Ezell, Edward Clinton,
The AK47 Story*

Eventually Kalashnikov's wounds healed to the extent that the hospital could do nothing more for him, but time was needed for him to make a complete recovery. As a result, he was sent home, to Alma-Ata for six months.

Settling into a small log house, Kalashnikov decided to try his hand at designing a submachinegun. Many Soviet designers had experimented in the 1920's and 1930's with pistol caliber submachineguns. All of them had been simple blow-back designs with unlocked breeches and fixed firing pins. The first of these had been designed by F.V. Tokarev in 1926. The experimental design used the rimmed Model 1895 Nagant revolver cartridge. In the 1930s V.A. Degtyarev, S.A. Korovin, F.V. Tokarev, S.A. Prilutskiy, I.N. Kolesnikov, and other designers continued developing submachineguns, but these were chambered for the the 7.62x25mm cartridge used by the Tokarev TT-30 pistol. The first Soviet submachinegun to emerge from this

Mikhail Timofeyevich Kalashnikov, The Man

process was the Pistolet Pulemet Degtyareva, or PPD34. The PPD34, and its successor, the PPD34/38 worked well enough, but required too much in the way of precision manufacturing to be suited for mass production on the scale that the Red Army would require during World War II. As a result, a much simpler design was submitted by G.S. Shpagin, and adopted in 1941 as the PPSH41. One of the PPSH41's most significant innovations was the use of stamped and pressed sheet metal assemblies produced from mild steel. While the PPSH41 was good, there was room for improvement, and a series of trials was held in 1942, and Kalashnikov submitted a design for consideration. Despite Kalashnikov's labors, A.I. Sudayev won the competition with his PPS43.

Kalashnikov Test Model
Submachinegun of 1942

Image Credit: Nedelin, Alexei,

Kalashnikov Arms, Design Military Parade

Kalashnikov's first design is noteworthy only in that it was the beginning of a career in gun design. It fired from a closed bolt when a striker struck the firing pin, and combined this mechanism with an amalgam of features from other designs. While recovering in Alma-Ata, Kalashnikov visited friends in the railway technical section, and convinced one of them, Zhenya Kravchenko to let him use the depot's machine tools to continue his design work. After three months of work, Kalashnikov produced a working design. He then went out to find a party official to sponsor his work. After pounding the pavement relentlessly with gun in hand, Kalashnikov was granted an audience with the Secretary of the Central Committee of the Communist Party of Kazakhstan. While the Secretary was not an expert,

he believed that there might be some merit to the design. As a result, it was arranged for Kalashnikov to continue his work in the model shops of the Moscow Aviation Institute (MAI) which had been moved to Alma-Ata as a protective measure. Kalashnikov continued to refine his submachine gun design, and when it was complete, it was sent to the Dzerzhinskiy Artillery Academy for testing and evaluation. After thoroughly examining the gun, the evaluation board concluded that Kalashnikov's design did not offer any significant advantage over PPS to warrant serial production.

The submission of Kalashnikov's gun was a major breakthrough as it brought Kalashnikov to the attention of General Anatoly Arkadaevich Blagonravov, the current Chair of Infantry Weapons at the Dzerzhinskiy Artillery Academy. As a result, the decision was made to provide Kalashnikov with a formal engineering education. Because of this, Kalashnikov never rejoined the military, but became a technician at the proving ground at Ensk. While at Ensk, Kalashnikov attracted further attention through his work on modifications to Goryunov machineguns.

These modifications brought him two "Author's Certificates," the closest thing the Soviet Union had to patents. It was also at Ensk that Kalashnikov first came into contact with such Soviet design luminaries as Degtyarev, Simonov, and Sudayev.

While continuing to work on both 7.62mm and 9x18mm submachineguns, he embarked on a new and more significant course of development when, in 1944 he was given some M1943 7.62x39mm cartridges to examine, and decided to work on a 7.62mm automatic rifle. His first project that used the M1943 cartridge was a selective fire carbine that used a rotating bolt operated by a cam lug moving in a groove in the bolt carrier. While its fixed magazine put it in the same class as the SKS, it used many features which would later reappear in the AK47. The Kalashnikov carbine was tested in 1944 and 1945. Despite a

favorable performance, the project was terminated with the adoption of the SKS.

Kalashnikov continued working on his automatic rifle, but he was not the first to develop an automatic rifle chambered for the M1943 cartridge. A.I. Sudayev submitted a 7.62x39mm automatic rifle in early 1944. It was a blowback operated gun using a massive bolt. Tests indicated that the gun would quickly shoot itself to pieces, and that further development was needed. Sudayev then submitted a second design that incorporated a rotating bolt mechanism and a folding butt. Tests indicated that the gun was too heavy, and the Artillery Committee of the Main Artillery Commission issued requirements for decreasing the weight.

Kalashnikov Experimental Avtomat of 1946

Image Credit: Nedelin, Alexei,

Kalashnikov Arms, Design Military Parade

Meanwhile, Kalashnikov's efforts continued. The main design problem, as he saw it, was to design an operating system that could be used in a variety of automatic weapons. After reviewing the options, Kalashnikov settled on the use of a gas operated mechanism. In early 1946, he sent off a technical data package for the new automatic rifle, to the Main Artillery Commission for evaluation. A short time later a reply from Moscow indicated that the design had been selected for development as an experimental weapon. However, prior to production of test models of the gas operated, rotating bolt rifle, Kalashnikov was required to create a design team. This he did, and it included A.A. Zaytsev, Engineer-Colonel V.S. Demin, V.V. Krupin, V.A. Kharkov, A.D. Kryakushkin, N.N. Afanasyev, and V.N. Punshin. Eventually, a working model was

Mikhail Timofeyevich Kalashnikov, The Man

constructed and submitted for firing tests. The tests indicated that some additional work was required. The 1946 Avtomat differs somewhat from the eventual AK47. The receiver body had a different profile, the gas piston housing was closer to the barrel, the receiver cover was shaped differently. The butt was attached by two metal extensions that slid over the rear of the receiver, and the fire control lever was mounted on the left side of the receiver.

Avtomat Kalashnikova 1947g, First Type
Image Credit: Nedelin, Alexei,

Kalashnikov Arms, Design Military Parade

One day in 1949, Engineer-Colonel Demin burst into Kalashnikov's office exclaiming: "Today you must dance, Mikhail Timofeyevich. The Avtomat Kalashnikova has been accepted as a standard weapon." Thus culminated four years of intense design and engineering work with the adoption by the Red Army of the 7.62mm Avtomat Kalashnikova Obrazets 1947g (7.62mm Kalashnikov Assault Rifle Model 1947). Large scale production of the AK47 began sometime between 1949 and 1950. In 1951, the Main Artillery Administration mandated a major change in the AK47's design process. The stamped receiver was abandoned and a machined forged receiver adopted. This second model AK47 was replaced with another variation of the machined receiver in 1954, which remained standard until the AKM was adopted in 1959.

The AK series has been a resounding success, with some 30 million being manufactured to date. As a result of this success, Kalashnikov's career has been very prosperous. A young man in a field dominated by his seniors, Kalashnikov had broken into the elite ranks of the Soviet military

technocracy. When released from the Red Army in 1949, Kalashnikov was assigned to the Izhevsk Machine Factory as a civilian engineer. While there, his professional and political star continued to rise. From construction and industrial engineer, he became a senior manager, overseeing production engineering and design operations.

As he rose within the Soviet weapons design industry, Kalashnikov ceased to be a member of a design team, and became director of one of the most important weapons design bureaus within the Soviet Union. After considerable study and evaluation of the stamped metal assembly process, Kalashnikov and his bureau were able to perfect a sheet metal receiver for the AK. Subsequent to that, the Kalashnikov design bureau produced a squad automatic weapon version of the AKM called the RPK. After this, the bureau produced a general purpose machine gun, the PK, chambered for the 7.62x54mmR cartridge. Even the Dragunov 7.62x54mmR SVD sniper rifle is a product of the Kalashnikov design bureau.

Kalashnikov has been honored and feted throughout his career by the Soviet government. In 1948 he was given the Stalin Prize for Industrial Work. In 1949 he became a Hero of Socialist Labor. He was granted membership in the Communist Party of the Soviet Union in 1953 and was selected to serve on the budgetary planning commission for the Soviet Union. In 1966 he was elected to serve as a Deputy of the Supreme Soviet. And in 1971 the title of Doctor of Technical Sciences was conferred upon him - a Soviet variant on the concept of knighthood.

Kalashnikov's designs are still predominant in the Russian military, although they are slowly being replaced by the Nikonov AN-94. One place where the Kalashnikov designs have not lost any popularity is the American commercial market where semiautomatic versions of his weapons are some of the most popular available to the American shooter. Kalashnikov

today stands among the foremost designer of infantry weapons in the world. He is, in fact the only designer whose small arms have and do run the entire infantry weapon gamut from submachine guns to carbines to infantry rifles to light machineguns to heavy machineguns. His influence over small arms development dominated much of the twentieth century and will most likely continue well into the twenty-first.
